Computer methods in applied mechanics and engineering

Subject Index of Volume 150

A posteriori
On *hp*- error estimation in the BEM for a three-dimensional Helmholtz exterior problem, A. Karafiat 199–214
Preconditioning of the *p*-version of the finite element method, V.G. Korneev and S. Jensen 215–238
New advances on a posteriori error on constitutive relation in f.e. analysis, P. Ladevèze and P. Rougeot 239–249
ProPHLEX—An *hp*-adaptive finite element kernel for solving coupled systems of partial differential equations in computational mechanics, T.J. Liszka, W.W. Tworzydlo, J.M. Bass, S.K. Sharma, T.A. Westermann and B.B. Yavari 251–271
On boundary-hybrid finite element methods for the Laplace equation, J.M. Maubach and P.J. Rabier 273–287
Adaptive multilevel BEM for acoustic scattering, M. Maischak, P. Mund and E.P. Stephan 351–367
A posteriori estimation of the error in the recovered derivatives of the finite element solution, I. Babuška, T. Strouboulis and S.K. Gangaraj 369–396

A posteriori error
Numerical simulation of non-conventional wells using adaptive finite element analysis, M.P. Reddy, M.K. Deb, J.M. Bass and H. Ning 109–124

Adaptive methods
Recent progress in multiblock hybrid structured and unstructured mesh generation, C.-Y. Huang 1– 24
Adjacency for grid generation and grid adaptation in Delaunay triangulation, Y.J. Song 57– 64
Numerical simulation of non-conventional wells using adaptive finite element analysis, M.P. Reddy, M.K. Deb, J.M. Bass and H. Ning 109–124
Local error estimation and adaptive remeshing scheme for least-squares mixed finite elements, G.F. Carey and A.I. Pehlivanov 125–131
PZ :An object oriented environment for scientific programming, P.R.B. Devloo 133–153
A posteriori error estimator and adaptive procedures for computation of shakedown and limit loads on pressure vessels, J.R.Q. Franco, J.T. Oden, A.R.S. Ponter and F.B. Barros 155–171
Inexact solvers on element interfaces for the *p* and *h-p* finite element method, B. Guo and W. Cao 173–189
An adaptive discontinuous Galerkin method for viscoplastic analysis, B. Fang, F.L. Carranza and R.B. Haber 191–198
On *hp*- error estimation in the BEM for a three-dimensional Helmholtz exterior problem, A. Karafiat 199–214
Preconditioning of the *p*-version of the finite element method, V.G. Korneev and S. Jensen 215–238
New advances on a posteriori error on constitutive relation in f.e. analysis, P. Ladevèze and P. Rougeot 239–249

ProPHLEX—An *hp*-adaptive finite element kernel for solving coupled systems of partial differential equations in computational mechanics, T.J. Liszka, W.W. Tworzydlo, J.M. Bass, S.K. Sharma, T.A. Westermann and B.B. Yavari 251–271
On boundary-hybrid finite element methods for the Laplace equation, J.M. Maubach and P.J. Rabier 273–287
A posteriori finite element bounds for linear-functional outputs of elliptic partial differential equations, M. Paraschivoiu, J. Peraire and A.T. Patera 289–312
Error control and mesh optimization for high-order finite element approximation of incompressible viscous flow, A.V. Ilin, B. Bagheri, R.W. Metcalfe and L. Ridgway Scott 313–325
Coupled model- and solution-adaptivity in the finite-element method, E. Stein and S. Ohnimus 327–350
Adaptive multilevel BEM for acoustic scattering, M. Maischak, P. Mund and E.P. Stephan 351–367
A posteriori estimation of the error in the recovered derivatives of the finite element solution, I. Babuška, T. Strouboulis and S.K. Gangaraj 369–396
Applications and numerical analysis of partial differential Volterra equations: A brief survey, S. Shaw and J.R. Whiteman 397–409
A posteriori error estimation—the relationship between different procedures, J.Z. Zhu 411–422

Boundary element methods
On *hp*- error estimation in the BEM for a three-dimensional Helmholtz exterior problem, A. Karafiat 199–214
Adaptive multilevel BEM for acoustic scattering, M. Maischak, P. Mund and E.P. Stephan 351–367

Finite element and matrix methods
Recent progress in multiblock hybrid structured and unstructured mesh generation, C.-Y. Huang 1– 24
Aspects of an adaptive *hp*-finite element method: Adaptive strategy, conforming approximation and efficient solvers, M. Ainsworth and B. Senior 65– 87
hp Optimization of finite element approximations: Analysis of the optimal mesh sequences in one dimension, I. Babuška, T. Strouboulis and K. Copps 89–108
Local error estimation and adaptive remeshing scheme for least-squares mixed finite elements, G.F. Carey and A.I. Pehlivanov 125–131
PZ :An object oriented environment for scientific programming, P.R.B. Devloo 133–153
A posteriori error estimator and adaptive procedures for computation of shakedown and limit loads on pressure vessels, J.R.Q. Franco, J.T. Oden, A.R.S. Ponter and F.B. Barros 155–171
Inexact solvers on element interfaces for the *p* and *h-p* finite element method, B. Guo and W. Cao 173–189
An adaptive discontinuous Galerkin method for viscoplastic analysis, B. Fang, F.L. Carranza and R.B. Haber 191–198
New advances on a posteriori error on constitutive relation in f.e. analysis, P. Ladevèze and P. Rougeot 239–249
ProPHLEX—An *hp*-adaptive finite element kernel for solving coupled systems of partial differential equations in computational mechanics, T.J. Liszka, W.W. Tworzydlo, J.M. Bass, S.K. Sharma, T.A. Westermann and B.B. Yavari 251–271
On boundary-hybrid finite element methods for the Laplace equation, J.M. Maubach and P.J. Rabier 273–287
A posteriori finite element bounds for linear-functional outputs of elliptic partial differential equations, M. Paraschivoiu, J. Peraire and A.T. Patera 289–312
Error control and mesh optimization for high-order finite element approximation of incompressible viscous flow, A.V. Ilin, B. Bagheri, R.W. Metcalfe and L. Ridgway Scott 313–325
Coupled model- and solution-adaptivity in the finite-element method, E. Stein and S. Ohnimus 327–350

A posteriori estimation of the error in the recovered derivatives of the finite element solution, I. Babuška, T. Strouboulis and S.K. Gangaraj 369–396
Applications and numerical analysis of partial differential Volterra equations: A brief survey, S. Shaw and J.R. Whiteman 397–409
A posteriori error estimation—the relationship between different procedures, J.Z. Zhu 411–422

General Rayleigh–Ritz and Galerkin techniques
An adaptive discontinuous Galerkin method for viscoplastic analysis, B. Fang, F.L. Carranza and R.B. Haber 191–198

Fracture mechanics
Preconditioning of the *p*-version of the finite element method, V.G. Korneev and S. Jensen 215–238

Geometric modeling
Recent progress in multiblock hybrid structured and unstructured mesh generation, C.-Y. Huang 1– 24
On application of differential geometry to computational mechanics, N. Lautersztajn-S and A. Samuelsson 25– 38
Geometry representation issues associated with *p*-version finite element computations, S. Dey, M.S. Shephard and J.E. Flaherty 39– 55

Incompressible and near incompressible media
Error control and mesh optimization for high-order finite element approximation of incompressible viscous flow, A.V. Ilin, B. Bagheri, R.W. Metcalfe and L. Ridgway Scott 313–325

Limit solutions
On *hp*- error estimation in the BEM for a three-dimensional Helmholtz exterior problem, A. Karafiat 199–214

Plasticity
A posteriori error estimator and adaptive procedures for computation of shakedown and limit loads on pressure vessels, J.R.Q. Franco, J.T. Oden, A.R.S. Ponter and F.B. Barros 155–171

Solutions of ordinary and partial differential equations
A posteriori finite element bounds for linear-functional outputs of elliptic partial differential equations, M. Paraschivoiu, J. Peraire and A.T. Patera 289–312
Applications and numerical analysis of partial differential Volterra equations: A brief survey, S. Shaw and J.R. Whiteman 397–409
A posteriori error estimation—the relationship between different procedures, J.Z. Zhu 411–422

Systems of linear and nonlinear simultaneous equations
Inexact solvers on element interfaces for the *p* and *h-p* finite element method, B. Guo and W. Cao 173–189
Preconditioning of the *p*-version of the finite element method, V.G. Korneev and S. Jensen 215–238

Viscoelastic and viscoplastic media
An adaptive discontinuous Galerkin method for viscoplastic analysis, B. Fang, F.L. Carranza and R.B. Haber 191–198

Viscous flow
Error control and mesh optimization for high-order finite element approximation of incompressible viscous flow, A.V. Ilin, B. Bagheri, R.W. Metcalfe and L. Ridgway Scott 313–325
